6. Regarding claim 10, claim is allowable over prior art of record because the cited references cannot teach or suggest the uniquely distinct features "wherein said intermediate frequency processor comprises a frequency synthesizer using interpolation and a linear feedback shift register, coupled to said micro processing unit, synthesizing said digital signal sequence to a plurality of synthesized signals".

7. Regarding claim 22, claim is allowable over prior art of record because the cited references cannot teach or suggest the uniquely distinct features "using interpolation and a linear feedback shift register to synthesize said digital signal sequence to a plurality of synthesized signals".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
